Finance streams liquidity from various pools on different blockchains. The core feature that underlines the role of Asva Finance in the DeFi market is multi-chain liquidity aggregation. Asva Finance decides on time and get the best of all worlds.

Existing DeFi solutions are chain-specific. Asva Finance, being integrated with the top DEXs on different blockchains, enables seamless multi-chain token swaps.

Asva Finance is a multi-chain DeFi aggregation engine that leverages the combined potential of DeFi protocols from various top blockchains to feature unique functionalities.

### Value propositions

- **Multi-chain token swaps**
  - $ASVA token has the following functionalities baked into its core.
  - **Multi-chain token swap**
  - **Multi-chain liquidity aggregation**
  - **DeFi portfolio management**
  - **Protocol incentive structure**
  - **Yield economics**
  - **Staking**

### Roadmap

**Overview**

Asva Finance is a responsive DeFi solution that exists as an interoperable protocol-based approach with a unique set of features.

**Vision**

To provide one-stop shop exclusive to your preference for all multi-chain capabilities.

**Asva Finance Product Functionalities**

**Overview**

Asva Finance is a premier product from Asva Labs, the world's pioneer platform to fuel interoperable apps for DeFi, NFTs, and portfolio management.

- **Overview**
  - $ASVA tokens will accredit the protocol incentive structure of the ecosystem on top blockchains like BSC, Polygon, and Ethereum.
  - Asva ecosystem.
  - $ASVA is the utility token of the Asva Labs ecosystem. It is a versatile currency that plays an integral role in fuelling the Asva economy.

**Value propositions**

1. **Multi-chain token swaps**
   - Asva Finance features a full-fledged interoperable DeFi dashboard that lets you monitor all your DeFi transactions from one interface.
   - Asva Finance leverages DeFi protocols from various top blockchains to offer a wide range of money market use cases like lending, borrowing, yield farming, and asset management.
   - The advanced cross-chain routing mechanism on Asva Finance equips users to access DeFi features on different blockchains to offer a wide range of money market use cases.

2. **Multi-chain liquidity aggregation**
   - Asva Finance features cross-chain product integrations.
   - As the governance token, $ASVA will grant voting rights to users and make them a part of the decision-making process. Token holders will have a say in various aspects concerning the future of the ecosystem following a community-driven DAO structure.

3. **DeFi portfolio management**
   - Asva Finance offers advanced product functionalities.
   - As the governance token, $ASVA will grant voting rights to users and make them a part of the decision-making process. Token holders will have a say in various aspects concerning the future of the ecosystem following a community-driven DAO structure.

4. **Protocol incentive structure**
   - Asva Finance presents an array of multi-chain DeFi use cases like token swaps, multi-chain token swaps, and portfolio management.

**Token distribution and allocations**

**Partners & Investors**

With many leading entities from the DeFi ecosystem, Asva Finance aims to make DeFi accessible to all users, regardless of their technical know-how.

**Team**

Asva Finance is a multi-chain DeFi aggregation engine.

- **Michael Huynh**
  - Co-founder DeFi Summit
- **Kumaravel N.**
  - Chief Executive Officer
- **Mallikarjuna Naidu**
  - Chief Technology Officer
- **Iliass Bouchir**
  - Chief Product Officer

**Advisors**

- **Hana Bouali**
  - Co-founder & Business Development
- **Wahaa Mannaa**

**Roadmap**

**PHASE 1**

- Q2 2021
  - Multi-chain token swap
  - Testnet V1.0 on BSC and Polygon

- Q3 2021
  - Security audit

- Q4 2021
  - Token smart contract
  - Seed funding

**PHASE 2**

- Q1 & Q2 2022
  - Multipath liquidity pools
  - Multi-chain token swap
  - Mainnet V1.0
  - Integration on top chains

- Q3 2022
  - Portfolio management
  - Multi-chain lending and borrowing
  - Mainnet V2.0

- Q4 2022
  - Borrowing
  - Multi-chain liquidity pools
  - Asva Vaults

**Assessment**

- **Value propositions**
  - Multi-chain token swaps
  - Multi-chain liquidity aggregation
  - DeFi portfolio management
  - Protocol incentive structure
  - Yield economics
  - Staking

- **Roadmap**
  - $ASVA stablecoin
  - Upgraded product versions
  - Advanced product functionalities
  - Cross-chain product integrations
  - Polkadot integration
  - Mainnet launch on top chains
